EDUCATION

University of Central Florida

Orlando, FL

Bachelor of Engineering, Computer Science — Expected May 2027

GPA: 4.0 | Dean's List 2023

- Coursework: Data Structures & Algorithms, Discrete Structures, Systems Software, OOP (Java), Computer Organization

University of Central Florida

Orlando, FL

Full Stack Coding Bootcamp Certificate

September 2023

- 240 contact hours — MERN Stack, REST APIs, GraphQL, SQL/NoSQL, Agile Development

WORK EXPERIENCE

Verizon Wireless

Orlando, FL

Business Account Manager

Nov 2023 – Present

- Acts as a trusted technical advisor to SMB enterprise clients — uncovering requirements, designing tailored solutions, and driving adoption across organizations with multiple technical and executive stakeholders.
- Delivers live product demonstrations and ROI presentations to audiences from IT teams to C-suite executives, translating complex technical capabilities into clear business value.
- Led district-wide adoption of Generative AI tools (Gemini, NotebookLM, prompt engineering) by designing training programs that automated workflows and improved team productivity.
- Built a logic-based Excel automation engine handling complex multi-condition pricing workflows, reducing deal turnaround time by 80%.
- Resolves integration and billing discrepancies by interpreting system error logs and leveraging internal APIs, bridging operations and technical support teams.

Wazuh, Inc.

Orlando, FL

Front End Developer Intern

Jun 2023 – Sep 2023

- Built and maintained React/JavaScript components for a cybersecurity dashboard serving thousands of enterprise users, integrating OpenSearch data visualizations.
- Translated complex backend security data into interactive visualizations, working cross-functionally with engineering and product teams in agile sprints.
- Managed iterative deployments via CI/CD pipelines and conducted code reviews to ensure software quality.

PROJECTS

AI Fighter Matchup | FastAPI + React + Gemini 1.5 Flash + PostgreSQL | GitHub

- Architected a full-stack AI-powered application in 72 hours — backend, frontend, user auth, and persistent database — with zero senior guidance.
- Engineered an AI agent using Gemini 1.5 Flash with custom system instructions enforcing structured JSON output for reliable backend-to-frontend data exchange.

MeetMatch | Django + React Native + PostgreSQL + Ticketmaster API | GitHub

- Built backend services and Ticketmaster API integration as part of a 5-person team for Knight Hacks Project Launch, a semester-long development competition at UCF.
- Developed a friend-matching and event-discovery mobile app connecting users to nearby events based on shared interests and location.

Who's That Pokemon (WTP) | Next.js + TypeScript + Google Gemini API | GitHub | Live Demo

- Built and deployed an AI-powered image identification app using Gemini API for real-time classification, live on Vercel.

SKILLS

Programming: JavaScript (React, React Native, Node.js), Python (FastAPI, Django), Java, C, C++, TypeScript, HTML/CSS

APIs & Integration: REST APIs, GraphQL, JSON, third-party APIs (Ticketmaster, Gemini), webhook patterns, CI/CD

AI & GenAI: Gemini API (prompt engineering, system instructions), NotebookLM, ChatGPT, Claude, AI agent design

Data & Tools: SQL (MySQL, PostgreSQL), MongoDB, OpenSearch, Excel automation, GitHub, Docker, Agile/Scrum

Languages: Spanish (Fluent), English (Fluent), Portuguese (Intermediate)
